CAREER OBJECTIVE

A well organized and motivated person with a strong foundation in data structures, algorithms, and software development. Known for thriving under pressure, managing time effectively, and delivering high-quality work within deadlines. Seeking an opportunity to contribute my skills in full-stack development and problem-solving to a dynamic and innovative team. Committed to continuous learning and professional growth in a fast-paced environment

EDUCATION

Kongu College of Engineering	MCA	-	2024-2026
Karan Arts and Science college	BSC	72%	2021-2024
S.R.G.D.S Matric Hr. Sec. School, Tiruvannamalai	HSC	82%	2020-2021
S.R.G.D.S Matric Hr. Sec. School, Tiruvannamalai	SSLC	67%	2019-2020

PROJECT

Nest Cove

[LIVE](#) | [GITHUB](#) | 2024

Tech Stack: React.js, Node.js, MongoDB.

The Dream Nest-Book platform allows users to filter homes based on criteria such as location, price, and size, making it easy to find properties that meet their preferences. Once a user finds a property they like, they can book it by selecting dates, confirming availability, and completing the necessary steps for payment or reservation. In addition to browsing and booking, the platform offers users the opportunity to become hosts and list their own properties for sale or rent. Hosts can create detailed listings, including descriptions, photos, pricing, and availability. The website also provides a user-friendly dashboard to manage and update their property details.

E-commerce

[LIVE](#) | [GITHUB](#) | 2025

Tech Stack: HTML, CSS, JavaScript

Developed a responsive Shoe-Store e-commerce website using HTML, CSS, and JavaScript. Designed the homepage with a banner, featured categories, and product sections showcasing prices, images, and ratings. Created individual product pages and a shopping cart for easy navigation and checkout. Focused on delivering a user-friendly interface with performance optimization and cross-browser compatibility.

CERTIFICATIONS

Certified in Python	CSC	2022
Certified in Javascript	MICROTECH	2023
Certified in Java Programming	UDEMY	2024
Certified in React Bootcamp	LETS UPGRADE	2024
Certified in Data Structure & Algorithm with Java	SCALAR	2025
Certified in Backend Rest API with Node js	UDEMY	2025

ACHIEVEMENTS

- Presented a paper on chatbot-based ticket booking system at a government engineering college in Erode. 2024
- Achieved Runner-up position in a coding competition, demonstrating strong problem-solving and algorithmic Skills. 2022

CODING PLATFORMS

Leet code: 190+ Problems are solved (C, Java and MySQL)
